

RIPON AREA SCHOOL DISTRICT
2018-2019
Permission for General Medical Needs at School

At many times throughout the school year, students may encounter various discomforts that may easily be treated while at school. Below you will find consent for some common situations that may arise while your child is at school.

- Ticks are becoming a common finding. Ticks may carry and spread disease. It is very important that ticks are removed promptly. There are school staff that are educated to properly remove ticks, and single use tick removal kits are provided by the school.
- Splinters may occur while your child is at school. Single use splinter removal kits are provided by the school. Removing splinters quickly may minimize student discomfort, so he/she may stay in school. School staff may attempt to remove superficial splinters, however, if the splinter is below the skin, or there is bleeding, the area will be cleansed and covered with a band aid.
- During the winter months in particular, students may suffer from dry throat and cough. The school supplies stock cough drops to minimize student discomfort and decrease classroom disruptions.
- Dry, itchy skin is common, particularly in the winter months. The school supplies over the counter lotion.

Student: _____ Grade: _____ Birthdate: _____

Please initial on each line for any procedure/treatment you give approval for the above mentioned child.

_____ *Tick removal*

_____ *Splinter removal*

_____ *Cough drops*

_____ *Lotion*

As the parent or guardian of the above mentioned student, I will keep the school district aware of any changes in health concerns for my child.

The Ripon Area School District school personnel have my permission to administer the above mentioned remedies to my child. I hold the Ripon Area School District, and the RASD employee(s) acting on this request, harmless on any and all claims arising from these treatments at school.
